

# Why Companies Choose ThreatReady Cyber Security Training Over Others

## Implementation Support for Long-Term Behavior Change

ThreatReady teaches employees how to recognize and deal with dozens of threat vectors from proper password management to incident response—and we do it in a way that employees enjoy. We keep campaigns fresh and deliver content through multiple channels, including social media.

Through real-world phishing simulations, employees are prepared to identify and react to actual phishing events. Advanced reporting provides detailed insights on end-user activity and enables targeted remediation.

ThreatReady then follows up with a full year-long implementation program - so that learning will translate into instinctive long-term behavior change, like putting on a seat belt or reaching for a fire extinguisher at the smell of smoke.

## We Manage it All for You to Save Staff Costs plus Make Sure it Gets Done

Most training programs require fulltime trained employees to be effective. ThreatReady works with your existing resources to develop a year-long awareness program customized to your specific needs - and we actively help you implement the program throughout the year.

## Companies Rave About It!

*"You have a professional, organized and responsive team. The content is creative and refreshing. Your partnership in our awareness campaign strategy is invaluable and is just what we needed."*

—Sam Manning, Sr. Manager, Corporate Information Security Office, Global Information Technology & Service Company

*"The managed campaign service is critical for taking the work off my plate and has exceeded my expectations!"*

— Ben Harris, Head of Information Security & Risk, Large International Talent Acquisition Company

## Upgrade Your Cyber Awareness with a FREE Phishing Simulation Training Test

We will phish your team to determine your organization's Threat Readiness.
