

Meet cyber security expert Robert Siciliano

When the Internet was still coming of age, Robert's startup security company was under attack by cyber criminals, and he lost thousands of dollars due to credit card fraud. He became one of the earliest victims of Internet crime and gained the knowledge to teach others how to protect their companies and themselves from online criminals.

Robert uses his personal experience and industry research to encourage his audiences to take control of their organizations' security. As one of the most highly respected experts on fraud prevention, cyber security, identity theft and online privacy, he has appeared on all major news networks and presented at high-profile conferences around the world, from Boston to Bogota and Dallas to Dubai.

He has worked with ExxonMobil, Intel, McAfee, MasterCard, Morgan Stanley, Merrill Lynch, KPMG, MIT, Transamerica and UPS as a trainer, consultant and speaker. He has been consulting, writing and speaking about security for more than 30 years and is a Certified Identity Theft Risk Management Specialist, Certified Speaking Professional and a Certified Private Investigator.

Robert teaches employees how to immediately use his security lessons in their personal and professional lives. Robert works with both private and public businesses, teaching clients how to keep their money, privacy and data secure against acts of fraud, identity theft and criminal hacking.

Speaker Topics

Providing Client Security and Ensuring Loyalty: A Guide for Financial Firms

Every week, Robert Siciliano inevitably hears from a distressed financial advisor, who has to rescue a client whose accounts have been compromised. The fact is, your moneyed clients are big targets, and they aren't necessarily cyber savvy.

Social Media Security: Extending and Defending Your Online Reputation

The risks we face from sharing certain information are substantial—from personal security to damaged reputations. Learn the fundamentals of reputation management and the safest implications of using social media.

Defending Against the Data Breach: Protect from Spyware, Malware, Ransomware and Keyloggers

We keep hearing about data breaches involving millions of credit card and account numbers. Data breaches cost thousands of dollars, and corporations can take a huge hit in publicity. Don't let your organization become a statistic!

Other speaker topics include:

- Mortgage Closing Wire Fraud: Protect Your Clients From Real Estate Fraud
- Putting Your Digital Data on Lockdown: Cyber Security Is Understanding Digital Literacy
- Security Appreciation, Not Security Awareness: Recognizing Risk Means Taking Security to Heart
- Identity Theft Protection Prevention: Social Security and Credit Card Numbers Are Big Targets
- Take Charge, Fight Back: Street-Smart, Street-Safe Personal Security for Public Facing Service Professionals
- Mortgage and Real Estate Fraud: A Real House of Cards – Preventing Wire Fraud
- Corporate-Travel Security: From the Moment You Hit the Ground, Predators and Thieves Target You
- Teens at Risk for Sexting, Sextortion and Suicide: Developing a Digitally Literate Defense Strategy

All of these programs are customizable for keynotes, webinars and workshops.
